SHEER

Light Filtering

- Retains Your Outside View

Depending on the exact shade you choose, you can keep them drawn and still see outside. With solar blinds, you don't have to give up your view in order to reduce glare, block UV rays, and decrease your energy costs. You can have it all.

CLASSIC

Light Filtering

Our classic collection light filtering roller shades are made from fine woven polyester fabric giving them a crisp, modern look.

They are designed for privacy but to allow filtered light to pass through the translucent fabric. The darker the color the less light that passes through the shades.

SLUB

Light Filtering

Jacquard roller blinds "SLUB" are made of 100% polyester. These shades allow for maximum privacy and help you control how much light comes through.

Compared to classic flat solid color roller shade fabric, this elegant jacquard is an amazing pattern to beautify your house. Quite, classic.

If you want a new and safe try this must be the best fabric choice.

SOLAR

10% openness

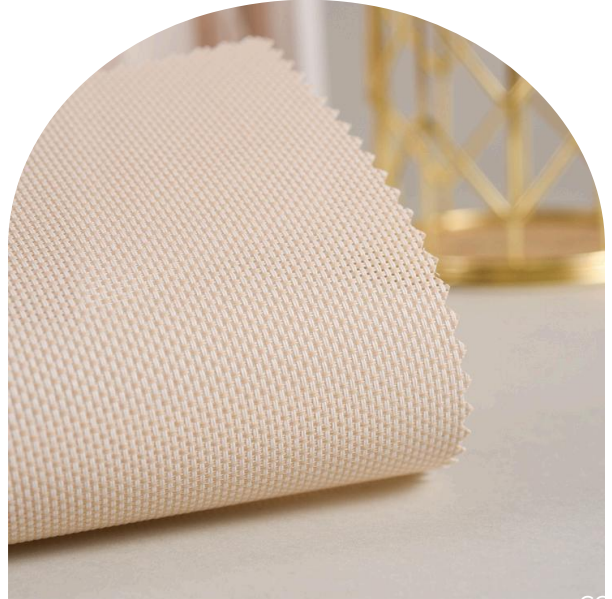

Solar fabrics block light but not the view to the outdoors. Lighter colors reflect more heat and light and provide less of a view during the day. Darker colors absorb heat and provide greater views during the day.

CLASSIC B/O

Blackout

There are many benefits when considering blackout shades for your home. Compared to sheer shades, light filtering shades, room darkening shades, and solar shades, blackout shades are by far, the best option for light control, privacy, and energy efficiency.

WELLS B/O

Blackout

Waterproof blinds are window curtains that prevent moisture from sticking and causing the build-up of mold and bacteria.

Waterproof blinds are also used for privacy and darkening a room.

Moisture resistance blinds are great for areas with high moisture, such as showers, indoor hot tubs, and even indoor patios.

Blackout

Blackout Roller Shade Energy Efficiency Another distinct advantage of using blackout roller shades is the energy efficiency savings they provide. Blackout roller shades are made of thicker material than normal shades. They absorb the loss of heat inside your home and reduce unwanted cool drafts from around windows.
